**Short report**

# «We are looking at a positive result: after a demanding year, Tellco pkPRO is standing very strong.»

2018 was a difficult investment year and a lack of political decisions in respect of social insurance schemes challenged us. Yet Tellco pkPRO succeeded again in finding its own solutions.

The Tellco pkPRO investment strategy has performed better than the overall market. We therefore view our investment year 2018 positively, despite negative signs in terms of investment success. The short-term underfunding in December showed us: the long-term horizon of Tellco pkPRO also balances out fluctuations in coverage. Without further measures, we were in surplus cover as soon as eight weeks later.

The success and trust in our work also confirms the strong growth of Tellco pkPRO. As at the end of 2018, Tellco pkPRO had 74,000 policyholders, which is 10% more than in the previous year.

This gives us a very positive outlook for the future and we are continuing to commit ourselves to a secure second pillar for everyone.
